PERSONAL PROJECTS

- **Hospital Management System (Final Year Project)**
A web-based application designed to streamline hospital operations through four core modules: Patient, Doctor, Admin, and Medical. The system enables efficient management of patient records, doctor appointments, staff administration, and medical inventory. Role-based access ensures secure data handling, and the interface supports real-time updates for seamless coordination among departments.

- **College Pool (Rapido Clone)**
The College Bike Ride Sharing System is a mobile-based application designed to provide students with a fast, cost-effective, and eco-friendly transportation solution to reach their college destination. The system allows students to request a bike ride, track the nearest available riders, and reach their college campus with convenience. The project is inspired by bike-sharing services like Rapido, offering a user-friendly platform where students can book rides to and from their college at affordable rates.

- **Bhavna's Bakery ERP(Client Based)**
The Bakery ERP System is an integrated software solution designed to streamline the operations of a bakery business with multiple shop outlets or franchises Management, Inventory Management, CRM, Order delivery Management, Product Management, Sales and Financial Management.

EXTRACURRICULAR ACTIVITIES

- **Volunteership ROLE, Amravati Half Marathon(August 2022 – Present)**
Assisted in event coordination, ensuring smooth race-day operations. Managed hydration stations and guided participants along the route. Collaborated with organizers to enhance participant experience.

- **Co-Convener , Vidyotan (National Level Tech-fest) (February 2024)**
I served as the Co-convener of Electronic and Telecommunication Department in Vidyotan 2024 where I interacted with many people and gained ample of knowledge and leadership skills.
